Undergraduate Thesis

Brain Tumor Detection using Convolutional Neural Network
Supervisor: Faisal Muhammad Shah, Associate Professor, Dept. of CSE, AUST.

We worked on different types of MRI images in this research work. The main objective is to detect the abnormal tissues on the MRI and segment the abnormal cells known as brain tumor from the MRI as well as try to find an optimal location of the region of interest. We've developed an ensemble deep learning architecture model to detect the abnormalities. Furthermore, our classification model worked well on other types of medical image sectors.
